

Edtech Innovations and Testbeds – Aligning the European perspective

A background image showing several hands of different skin tones assembling interlocking gears. The gears are in shades of blue and yellow. The hands are positioned around the gears, with some fingers pointing or touching them, suggesting a collaborative effort to put the pieces together. The overall lighting is dim, with the hands and gears being the primary light sources.

Global Education Technology Market (Formal & Corporate)

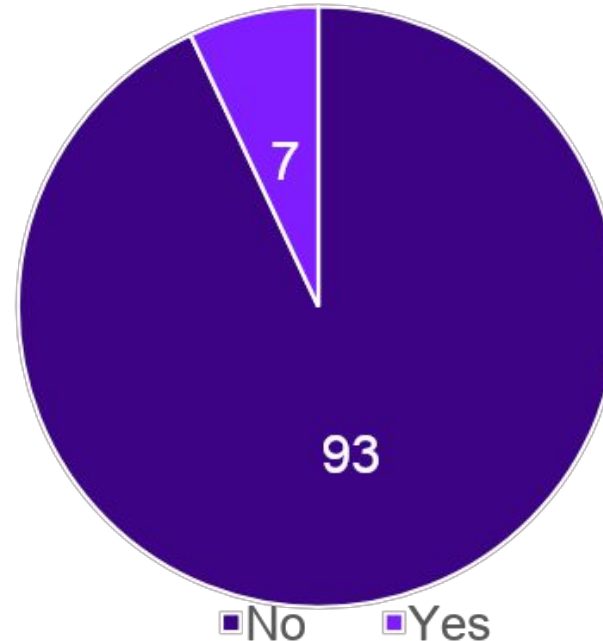

“This (growth) is ascribed to the emergence of AI and digitalisation in EdTech solutions.

Edtech – no guardrails

(Formal & Corporate)
% of Edtech tools that can show
Rigorous Evidence

“the impact of EdTech ..
lacks unequivocal proof
through clear measurement.

there is currently little
independent evidence for
either their efficacy or safety,
and no specific regulations

“EdTech investors ...,
prioritise profitability over
educational efficacy.

...scaling without evidence
of positive impact, has
resulted in the widespread
distribution of low-quality
products in schools”

Overwhelming choices

With thousands of educational technology (EdTech) tools available, navigating the options can be overwhelming

.... education institutions are currently questioning their ... skill sets required to appropriately evaluate and vet these new technologies

COUNCIL OF EUROPE

CONSEIL DE L'EUROPE

An overwhelming variety of tools available, each claiming to improve student outcomes Added layers of complexity about compatibility, security and cost can lead to decision fatigue. (2024)

EdSurge

66% of Swedish secondary teachers agreed that learning materials should be print-first in the future (2025)

The Brussels Times

Educational technology research is at a crucial juncture, where the rapid pace of technological advancement, increasing complexity of learning environments, and uncertainty about the field's future demand research that is aware, relevant, and critical.

(Schmidt, McDonald, & Moore, 2025)

Competing in a Global arena

Fragmentation of the Single Market hinders innovative companies that reach the growth stage from scaling up in the EU.

The future of European competitiveness (Sept 2024)

Mario Draghi

“with markets **fragmented** across member states, European entrepreneurs are finding it hard to compete with U.S. and Chinese tech giants.”

just under 70% of EdTech providers within the greater European region are micro-organisations

Educause

Overdue Change for Edtech is coming

To address the challenges of trust, transparency and evidence-based decision making in AIED, *an internationally recognised, independent review framework is essential.*

Towards a European review framework for AI EdTech systems (2024)

*UNESCO is calling on its Member States to ensure **the fair, equitable and safe development of educational technologies.** This means establishing appropriate normative frameworks and setting standards...*

Global Education Monitoring Report (2023)

*Consensus must be reached regarding the minimum quality standards expected of EdTech. ... the current disjointed approaches **must** be consolidated into a unified EdTech quality framework.*

Why we need global minimum quality standards in EdTech (2024)

The Gap

While the industry welcomes and even demands some kind of regulatory framework, **there is a need for this to be**

- **independently implemented,**

- **locally relevant,**

- **internationally aligned and include long-term policy goals.**

Kim Brandes

NOLAI - in short

RESPONSIBLE AI IN EDUCATION

Develop and research responsible AI for primary and secondary education

Funding
National Growth Fund
€143 million

Duration
2022-2032

Location

Nijmegen, the Netherlands

Scope

- 9 strategic partners
- 55 partners
- 24 ongoing projects
- 10 pending projects
- 80 AI prototypes in total
- 67 employees (incl. 10 teachers)

Radboud Universiteit

Universiteit Utrecht

Bridging the Gap

- A unique consortium - focused group of experts.
- Already working on these challenges at the national level in Europe.
- Experts who can support a Europe wide infrastructure and models.
- We welcome future partners (Spain and Italy).
